Objective

Dedicated and results-driven B.Tech graduate specializing in Artificial Intelligence and Data Science from CDGI Indore, with a strong foundation in Flutter, Dart, Firebase, and full-stack development. Seeking a Software Developer role where I can leverage my hands-on experience in building responsive, cross-platform mobile applications and integrating scalable backend solutions. Passionate about crafting intuitive user experiences, writing clean and maintainable code, and contributing to impactful tech-driven products within a collaborative and innovative team environment.

Experience

TAYGETE SOFTWARE SOLUTIONS PVT. LTD.   07/2024 – Present
Software Development Intern
- Developed and Maintained web application using PHP, HTML, CSS and jQuery.
- Integrated various features provided in Firebase into the webapps.
- Assisted in optimization of web application for maximum speed and scalability.
- Debugged and troubleshooted issues in existing codes.
- Applied problem-solving skills and analytical abilities.

GOOGLE DEVELOPER STUDENT CLUBS - CDGI   07/2023 – 07/2024
Lead
- Organized and supervised club activities, including workshops, hackathons, and tech talks, with a focus on promoting hands-on learning and technical skill development.
- Engaged with wider student community to promote club's activities and encourage participation.

GOOGLE DEVELOPER STUDENT CLUBS - CDGI   09/2022 – 04/2023
PR and Outreach Insider (Executive)
- Collaborated with PR and Outreach team to develop and execute strategic communication plans for GDSC-CDGI events and initiatives.
- Actively participated in organizing and coordinating workshops, hackathons, and tech talks to foster a vibrant tech community within the institution and beyond.

Skills & Abilities

- Flutter and Dart Programming
- Google Cloud
- Python
- Team Collaboration
- HTML, CSS
- Communication Skills
- PHP
- Problem-solving

Projects

MINOR & MAJOR PROJECT - CARECONNECT

Developed the cross-platform mobile application for CareConnect, a healthcare platform enabling users to check and book real-time hospital bed availability. Built using Flutter and integrated with Django REST APIs developed by teammates, the app offers a clean, responsive UI and seamless interaction with the backend services. The web platform was simultaneously developed using React by other team members. Completed as both my minor and major project, this application highlights my ability to independently design and implement a real-world, mobile healthcare solution.

PAWSITIVE

A cross-platform Flutter app that connects pet owners with adopters. Integrated Firebase for real-time data, authentication, and cloud functions. Designed an intuitive UI for listing nd browsing pets, with secure-environment management and custom navigation for enhanced user experience across Android, iOS, macOS, and Windows Platform.
